NanoVox — Corpus v9 · Transcripts, batch 8 (C-0401 to C-0450 of 600)

Every caller_ref resolves to a record in the v9 Member Master or Employer Contacts; the name spoken is the name on that record; a broker named aloud is that employer's broker of record; a tagged product line is one the group holds. Carrier is held per line on the Employer Master and is deliberately not spoken. Employer, industry, group size and renewal month join from caller_ref and are not repeated here.
